Revised & printed in January 2015

We can change the world and
make it a better place. It is in
our hands to make a difference.

The “Javlin” brand has been in existence for over 20 years. The company behind the brand has been manufacturing and exporting internationally acclaimed workwear for over 60 years!

Our team of technical experts put careful consideration into the design and function of each and every style that we put out.

Textile and trim sourcing are equally as important as quality manufacturing and we carefully select the fabrics and accessories that go into the making of our supreme garments.

Innovative design, technical features, comfort, durability and strength defines our workwear.

We have a wide variety of in stock programs allowing us to offer you, the customer, turnkey workwear solutions. With our roots being firmly African, we are passionate about dressing the people of this beautiful continent in great garments.

Once you have worn our products, its hard to wear anything else.

“Don’t compromise, wear only Africa’s finest.”

1. SABS SANS 434
Our range of SABS (South African Bureau of Standards) garments are certified in accordance with SANS 434:2011 edition 5. Numerous tests are done to ensure the highest standard of quality.

2. J54
Our 100% Cotton J54 fabric is certified SANS 1387:2009 addition 2.1 part 4. Comfortable and breathable, yet tough for hard working environments.

3. D59
Our 100% Cotton D59 fabric is certified to SANS 1387:2009 edition 2.1 part 4. We have a regular finish, a flame retardant finish and a flame retardant/acid resistant finish

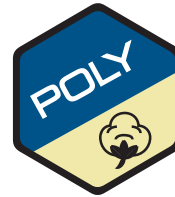

4. J54 - 100% COTTON
100% Cotton fabric, made according to J54 specifications. Comfortable and breathable, yet tough for hard working environments.

5. 100% COTTON
Cotton is a natural fibre that gives the wearer added comfort. It is breathable and keeps the body cool as well as having the ability to absorb perspiration. It has the best natural safety features of all fabrics. Everyone loves to wear cotton.

6. POLY VISCOSE
Viscose rayon is similar to other natural fibers, such as linen or cotton, even though it is man-made. Viscose is made from a cellulose solution made from wood pulp. Durability and comfort are key features.

7. POLYCOTTON
A special blend of wash and wear Polyester and Cotton makes this fabric comfortable yet durable as well as breathable. It does not crease like 100% cotton and has better colourfast properties.

8. 100% POLYESTER
100% Polyester is an extremely durable man-made fibre that can handle tough working environments. Polyester has great colourfast properties and little effort is required to maintain products made in this fabric.

9. FLAME RETARDANT/ ACID RESISTANT
This fabric is certified to ISO EN 532 and ISO EN11611/11612 for flame retardancy and ISO EN 6530:2011 for acid resistance. Our D59 fabric has been treated to protect under extreme working conditions, making it flame retardant as well as acid resistant.

10. FLAME RETARDANT
Our flame retardant fabrics conform to international standards ISO EN 532 and ISO EN11611/ 11612. The finish used on selected garments provides protection against flashes, fires and electrical charges.

11. ACID RESISTANT
These garments have been chemically treated to repel not only acid, but water and oil as well. Water repellency EN 4920 grade 4 after 5 washes and Oil repellency ISO 14419-1998 > grade 5.

12. ACID PROOF
Our acid proof garment fabric is certified to ISO 6530:2011. It is 100% repellent and has 0% penetration to the following concentrated acids: Hydrochloric acid - HCL 32%, Sulfuric acid - H₂SO₄ 20%, Nitric - HNO₃ 65%, Sodium Hydroxide - NaOH 50%

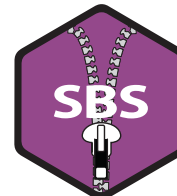

13. WATER PROOF
Our water proof garments have been specially coated to protect the wearer from the elements.

14. COLD RESISTANT
The cold resist garments have added padding to keep the wearer warm in colder environments. The fit on these garments are generous, allowing the wearer to also use additional layers of warm clothing.

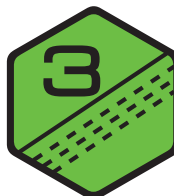

15. SAFE LITE
All our reflective tapes are EN471 Class II certified. Visibility is always a priority, so be bright by wearing Safe Lite.

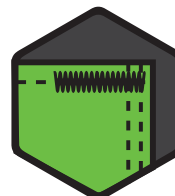

16. SBS
Certain garments use plastic injection moulded zips from SBS, the world's leading technical zip manufacturer. These plastic zips are stronger and more environmentally friendly than aluminium zips.

17. YKK
The world's largest zip manufacturer, established in 1934. We use YKK zips on our premium "javlin" brand and on our SABS garment".

18. TRIPLE STITCH
Triple needle stitching, also known as "posting" or 3 needle flat-fell seaming is 3 times as strong as single needle stitching. We use it on all stress bearing seams especially the seat seam.

19. BAR TACKED
All major stress points have been bar tacked for extra durability. This quality feature will add extra life to your garment.

20. CELL PHONE POCKET
A cell phone is an essential part of everyday life, which is why our technical garments carry this feature.

EMBROIDERY SCREEN-PRINTING AND BADGES

An excellent way to enhance your company image and advertise your product.
We offer both facilities and will originate screens and positives from your artworks.
For more information, please contact our sales team.

TERMS AND CONDITIONS

- All prices excluding VAT.
- Surcharges apply to big sizes.
- We endeavour to have all orders ready for collection within 24 hours.
- An amended order will be treated as a new order.
- No exchanges or returns will be accepted later than 21 days after Invoice date.
- All returns will incur 10% handling fee.
- No returns or exchanges will be accepted without original documents, including Invoices.
- Returns and exchanges will only be accepted in a resaleable condition, in original packing with labels.
- No returns and exchanges will be accepted if the garments have been altered, branded or changed in any way.
- It is the customers responsibility to check products for any form of defects before proceeding with branding.
- Products purchased at less than R50.00 ex VAT in value, will not be accepted for return.
- No returns will be accepted on sales items.
- It is the customers responsibility to advise in writing of any changes of company details, signing powers and authority to place orders.
